Volume 107 Issue 4 | EAP August 2022

Epistle
235 Highlights from this issue
N Gupta, N Brown

Review
236 How to use autoantibodies in suspected paediatric rheumatic disease
J Keightley, J Walsh, R M Bland

Best practice and Fifteen-minute consultations
242 Fifteen-minute consultation: Decision-making pathway for neonatal vascular access
E Osmond, N Williams

246 Fifteen-minute consultation: Child with an incidental finding of a fatty liver
J Chan, G Gupta

253 Fifteen-minute consultation: Clinical pubertal assessment
P Prentice

257 Fifteen-minute consultation: oral ulceration in children
L Johnston, L Warrilow, I Fullwood, A Tanday

Epilogue
265 Don’t just look at the surface: when mucosa tells more than the skin
A Trombetta, I De Nardi, E Barbi, V Declich, R Dall’Amico

268 A common complaint… a rare disease!
M-B Toner, S Molley, P Mullen, A Thompson, I Speirs

271 Unilateral leg swelling in a newborn
L Cortellazzo Wiel, I Berì, M Starc, F M Murru, E Barbi, F M Rosso

274 BCG lymphadenitis: a potential complication of immune reconstitution following haematopoietic stem cell transplant
C Tedjip, J Schijns van der Loeff, E Williams, S Owens, S Powell, A Gennery, M Slatter

276 Adolescent with abdominal pain poorly responsive to analgesia
N Chanchlani, P Jarvis, J W Hart, C H McMillan, C R Moxon

Interpretations
279 How to interpret the paediatric 12-lead ECG
P Mikous, P Shnaitman, C Kanaris

Guideline review
288 Guideline review: RCPCH perplexing presentations, fabricated or induced illness in children guidance 2021
K R Wear, S Li

292 NICE guideline review: neonatal infection: antibiotics for prevention and treatment (NG195)
S P Paul, H Khantak, P K Kini, P A Heaton, N Goel

Quality improvement
298 Implementing less invasive surfactant administration on a neonatal unit
S L Williamson, H McDermott, H Gouda

302 Introducing a one-queue model to the paediatric emergency department
C Greenbury, L Asim, H Baynes, R C Mitchell

Key publications in paediatrics: Picket
307 Continuous glucose monitoring improves patient satisfaction and frequency of glucose monitoring but does not lead to better glycaemic control in youth with type 1 diabetes
M Farrant, A J Friend

309 Treatment with amoxicillin for 3 days for chest-indrawing pneumonia was non-inferior to treatment for 5 days in HIV-uninfected Malawian children
A A Ntovolou, S Murphy

310 Nirsevimab reduces medically attended RSV-associated lower respiratory tract infection and hospitalisations in healthy pre-term infants
S Murphy

312 Olanzapine was an effective additional antiemetic for children and young people undergoing highly emetogenic chemotherapy
A J Friend, B Phillips
